## Patrik Andiné

During several years working with drawing and painting Patrik Andiné has never denied that his main interest lies in depicting and constructing realistic pictures.

The different themes in his paintings are many. The pictures sometimes have so many narrative qualities that they almost seem collected from stills out of fiction films.

His specific hues and his distinctive environments suggest influences from early animated fiction films and at the same time he hesitates at being compared to surrealistic art or psychoanalyzing concepts.

In Patrik Andiné's work the unspoken is the significant.
