Hickory Golf Experience

Hickory golf is the most organic way to play golf, which utilizes authentic equipment used more than one hundred years ago. Before there were titanium golf clubs and steel/graphite shafts, players used clubs made from hickory. Before there were synthetic covers and multi-compound layered golf balls there were “featheries” and “guttys” made from feathers, leather and later, tree sap. The game was a romantic waltz between the player, nature and primitive tools.
