Hickory Golf Experience

Hickory golf is the most organic way to play golf. It is golf played with authentic equipment used more than one hundred years ago. Before there were titanium golf clubs and steel/graphite shafts, players used clubs made from hickory. Before there were synthetic covers and multi-compound layered golf balls there were “featheries” and “guttys” made from feathers, leather and later tree sap. The game was a romantic waltz between the player, nature and primitive tools.

- » Shotgun start or tee times (scramble format for less experienced players and individual scoring for avid or experienced players is recommended)
- » Two replica “Hickory golf balls” per player
- » Use of authentic hickory clubs
- » Orientation to Hickory golf equipment and era
- » Full-time monitored play
- » Pairings (if needed)
- » Tournament scoring
